This application is in condition for allowance except for the following formal matters:

Claims 1-24 are objected to because of the following informalities: In claim 1, the preamble of the claim sets forth "imaging of pulmonary compliance" however, the body of the claim merely sets forth "calculating local pulmonary compliance". It is unclear as to where "distribution of tidal volume" is determined and how it related to "measuring volume of local concentrations..." In claim 3, "the lung images" lacks antecedent basis. Claim 7 is incomplete in that the preamble is directed to "imaging of distribution of functional residual capacity (FRC)", however the body of the claim merely sets forth steps used to determine whole lung volume. In claim 9, "the lung images" lacks antecedent basis. The preamble of claim 13 is inconsistent with that of claim 12 from which it depends. In claim 14, the preamble of the claim sets forth "imaging of pulmonary compliance and distribution of functional residual capacity (FRC)", however, the body of the claim merely sets forth "calculating local pulmonary compliance" and "determining whole lung volume". It is unclear as to where "distribution of tidal volume" is determined and how it related to "measuring volume of local concentrations..." In claim 16, "the lung images" lacks antecedent basis. Appropriate correction is required.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
